OHIO DATA USERS CENTER

The Ohio Data Users Center (ODUC) was established in 1978 as a result of an agreement between the Ohio Department of Development and the U.S. Bureau of the Census under the "State Data Center" program. The primary objective of ODUC is to assist clients in both the public and private sectors gain access to the broad range of published and computerized census data. ODUC's role as a state data center has expanded, enabling the office to provide a broader range of services to business, government and the general public in the use of noncensus related data and information services.

OHIO COUNTY PROFILES

The Ohio County Profiles are designed to offer a statistical compendium of selected economic, demographic, and cultural variables for Ohio and its 88 counties. The primary goal of the Ohio County Profiles is to provide businessmen, academicians, researchers, planners, developers, state and local government leaders, and the general public with an overview of the socioeconomic characteristics of the State and counties. Further detail and additional information is generally available from the source document. A listing of sources is included at the back of the publication.

The information contained herein was collected from a variety of the governmental and private sources. Because of the variation in frequency of publication and time lags involved, the years for which data are presented vary accordingly. Every effort has been made to insure that the most recent data available has been used. Updates of the profiles are done periodically for those items which are revised.

Any comments or suggestions to improve the usefulness of the profiles would be appreciated and may be addressed to the office below.

APPENDIX A

AREA DEMOGRAPHIC SUMMARY

Documentation

SOURCE: Census of Population and Housing, 1980: Summary Tape Files 1A and 3A (Ohio) [machine-readable data file]/prepared by the Bureau of the Census.--Washington: The Bureau [producer and distributor], 1981 and 1982.

PREPARED BY: The Ohio Data Users Center
Ohio Department of Development

This report is based on Summary Tape File 1A, complete count data, and STF3A, sample data, which were both produced by the U.S. Bureau of the Census. The Area Demographic Summary is designed to provide a brief overview of a given area based on the 1980 Census data. This abstract contains much of the most popular information from the complete count and sample data tapes.

Area Demographic Summaries can be produced at state, county, place, township, census tract, block group, or enumeration district geographic levels. In addition reports can be produced to represent a client's own defined area such as groups of counties, tracts, etc.

Questions regarding thee data should be directed to:

The Ohio Data Users Center
Ohio Department of Development
P.O. Box 1001
Columbus, Ohio 43216
(614) 466-2115

TABLE DEFINITIONS

Explanations of specific table headings are listed below. For further detail concerning these tables or for definitions of those not mentioned please refer to "Census of Population and Housing, 1980: Users' Guide," for sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or any U.S. Department of Commerce district office.

Spanish Origin

Spanish Origin is not a race category but may be viewed as a nationality group, the country in which a person's parents or ancestors were born. Persons of Spanish Origin therefore may be of any racial group.

Household

The person or persons occupying a housing unit.

Family

Two or more persons, including the householder, who are related by birth, marriage, or adoption, and who live together as one household.

4 Years of College

Four years of college is not necessarily equivalent to a baccalaurate degree as some areas of study require different lengths of time. This figure represents the percentage of persons 25 and older who have completed at least 4 years of college.

Median Contract Rent

The median monthly cash rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included.

Median Value Owner Occupied Housing Units

The respondent's estimate of the current dollar worth of the property. Represents the median value of owner-occupied noncondominium housing units.

Labor Force Statistics

Persons 16 years and over were classified as to their labor force status the calendar week prior to the date they completed their census questionnaires, generally the last week of March, 1980.
Total Labor Force: members of the Armed Forces and employed and unemployed civilians.
Employed: members of the civilian labor force who were either "at work" (full or part-time employees, those in their own business, or those working 15 or more hours as unpaid workers on a family farm or business) or "with a job but not at work" (had jobs but were temporarily absent).
Unemployed: members of the labor force are those who were neither "at work" nor "with a job but not at work" and those who were: a) looking for a job within the last 4 weeks, and b) available to accept a job.
Not in Labor Force: the number of persons 16 and over who were not in the labor force (consists mainly of students, housewives, retired workers, inmates of institutions, disabled persons, seasonal workers and persons who have ceased looking for a job).

Income

Total income includes wages, salaries, farm and nonfarm self-employment, interest, dividends, net rental, social security, public assistance, and all other sources.

Household Income: total money income received in calendar year 1979 by all household members 15 years and older. Household income differs from family income by including income received by: a) all household members 15 years and older, not just those related to the householder, and by, b) persons living alone and in other nonfamily households.

Family Income: total money income received in calendar year 1979 by family members 15 years and older.

Per Capita Income: the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population (including patients or inmates in institutional quarters) in that group.

Poverty Status

Households and persons are classified as above or below the poverty level by comparing their total 1979 income to an income cutoff or "poverty threshold". The income cutoffs vary by family size, number of children, and age of the householder. Poverty status is determined for families and persons not in families except for inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 15 years old.

DIFFERENCES BETWEEN STF1 AND STF3

Summary Tape File 1 contains complete count data, the information gathered about each person on the April 1, 1980 Census day. Summary Tape File 3 primarily contains sample data which is inflated to represent the total population. This sample is based on one out of every six housing units or households for most areas of the country. Areas estimated to contain 2,500 or fewer persons have a 3 out-of-every 6 sampling rate.

Some caution should be taken in directly comparing STF1 and STF3 data. The weighting procedure used with the sample data will produce totals which are slightly different from the complete count results. For example, the sum of all households by income category (STF3 data) will be somewhat different than thetotal number of households (STF1 data). The table which follows the suppression discussion indicates the summary tape which was used for each item in the Area Demographic Summary.

SUPPRESSION IN CENSUS DATA

In order to maintain the confidentiality promised respondents and required by law, it is necessary for the Census Bureau to make sure that its public data does not disclose information about any individual. Therefore, the Bureau suppresses tabulations of certain characteristics of very small groups of people or housing units. The smaller the geographic area the more likely suppresion will occur.

Several basic counts are never suppressed, while the others must maintain a minimum number of persons or housing units for suppression not to occur. The following table indicates whether or not suppression could occur for each item as well as listing the required cell number for no suppression.

SUMMARY TAPE FILE LOCATION AND SUPPRESSION INFORMATION

DEMOGRAPHIC SUMMARY TABLE	SUMMARY TAPE FILE	SUPPRESSION
Persons by race	STF1	no suppression
Persons of Spanish Origin by race	STF1	no suppression
Housing units (occupied)	STF1	must have at least 5 owners and 5 renters for tenure to be displayed
Households	STF1	no suppression
Families	STF1	no suppression
Persons per household	STF1	no suppression
Persons by age	STF1	must have 15 persons
Persons 25 years and older by education	STF3	must have 30 persons
Median contract rent	STF1	must have 5 renter occupied housing units
Median value owner occ. housing units	STF1	must have 5 owner occupied housing units
Labor force status by Race	STF3	must have 30 persons in a race category & respect rules of complimentary suppression
Labor force status for persons of Spanish Origin	STF3	must have 30 persons of Spanish Origin
Income	STF3	must have 10 occupied housing units
Poverty household	STF3	must have 10 occupied housing units
Poverty persons	STF3	must have 30 persons
